

FLORIDA VIP FOR HEALTHY COMMUNITIES

Who We Are

We are a community resource program that provides science-based information to help Floridians make informed choices on how to best protect themselves, their family, and the community from vaccine-preventable illnesses like COVID-19 & influenza.

What We Do

We host and participate in community educational events, including virtual community forums, town halls, and mobile health clinics to bring information and free health screenings to the communities we serve.

Vaccinate

Vaccines are a safe and effective way of protecting people against harmful diseases without having to be infected with them.

Know Your Risk

Some groups have a higher risk of severe illness due to COVID-19 or flu. We are prioritizing those groups to raise awareness regarding certain risk factors.

We encourage you to sign up for our free health screenings, if you are:

- Black/African American
- At least 18 years old
- Diagnosed or have a family history of chronic conditions like high blood pressure, type 2 diabetes, overweight or obesity

Immunize

Immunity is the result of a vaccination when your body has made antibodies to be ready to fight a new virus or other germ.

Covid-19 FAQs

Can Covid-19 vaccines cause severe long-term effects?

A: Some people may experience mild or moderate flu-like symptoms after vaccination and it usually lasts 1-2 days. This means your body is making antibodies against the virus.

How do my pre-existing conditions impact the vaccine?

A: People with diabetes, high blood pressure, and those who are overweight, are at increased risk for severe illness & death from COVID-19. COVID-19 vaccines are strongly recommended for people with underlying medical conditions.

Protect

Immunity can keep you from getting sick or severely ill. It stops the virus from spreading, and protects communities.

How To Partner

Inform: Help us raise awareness by sharing about the FL-VIP program in your community.

Consult: Support and plan community health events in your community.

Involve: Share about the resources you know that best serve the community.

Collaborate: Work with us to create new opportunities for your community.

Empower: Work together with other partners to provide and enable them with support for health equity initiatives in your community.
