

FLORIDA VIP FOR HEALTHY COMMUNITIES

Who We Are

We are a community resource program that provides science-based information to help Floridians make informed choices on how to best protect themselves, their family, and community from vaccine-preventable illnesses like COVID-19 & influenza.

What We Do

We host and participate in community educational events, including virtual community forums, town halls, and mobile health clinics to bring information and free health screenings to the communities we serve.

Vaccinate

Know Your Risk

Some groups have a higher risk of severe illness due to COVID-19 or flu. We are prioritizing those groups to raise awareness regarding certain risk factors. We encourage you to sign up for our free health screenings, if you are:

- Black/African American
- At least 18 years old
- Diagnosed with a chronic condition or have a family history of chronic conditions like high blood pressure, type 2 diabetes, overweight or obesity

Immunize

COVID-19 FAQs

Can Covid-19 vaccines cause severe long-term effects?

A: Some people may experience mild to moderate flu-like symptoms after getting vaccinated, which usually lasts 1-2 days. This means your body is making antibodies against the virus.

How do my pre-existing conditions impact the vaccine?

A: People with diabetes, high blood pressure, as well as those who are overweight, are at increased risk for severe illness from COVID-19. COVID-19 vaccines are strongly recommended for people with underlying medical conditions.

Protect

Get Involved

We host virtual community forums, town hall events, and mobile health clinics in your community. To get involved, you can:

- Join us for our in-person events.
- Like and share our events and information on social media.
- Refer our program to enthusiastic community partners.
- Become a community volunteer.
- Check out our website for more information and upcoming events.
