# Welcome to 2023!

## Miniseries on Funding for Citizen\* Science

If you're visiting this site you're likely already intrigued by citizen science as a research method,

## 2023 Monthly Office Hours

We - NASA's Citizen Science Officer Marc Kuchner and Citizen Science

[CURRENT SERIES](#) [ABOUT](#) [RECORDINGS & RESOURCES](#)[CONNECT](#) [CODE OF CONDUCT](#)

make your work possible.

Over four events (one in collaboration with the Citizen Science Association), we will cover what belongs in a citizen science project budget, how to navigate NASA's Research Opportunities in Space and Earth Sciences or ROSES, how other federal funding agencies strategically include citizen science methods in their portfolios, and make lots of opportunity to learn from peers and program officers. [Jump to full schedule for details.](#)

\*NASA citizen science projects are open to everyone around the world and participation is not reserved for U.S. citizens or residents. We consider it a best practice to avoid the word "citizen" in communications with the public. Instead, we recommend referring to project participants as "volunteers," "participants," "colleagues," etc.

And, as always, we want to hear YOUR project news! [Let us know what's new by filling out this short form.](#)

we've always had productive, problem solving conversations with the people who join. So we are making office hours a monthly event. We encourage you to register for the series, put them in your calendar, and join us when you have a question or time allows. **Our 2023 schedule of office hours follows the detailed schedule for the funding miniseries.** And remember, if these times don't work for you, [send us an email](#) - we'd be happy to find a time to talk that does). We are here to help you succeed!

## Miniseries on Funding – detailed schedule

**NOTE:** Each event will begin promptly at 3:00 pm Eastern / 2:00 pm Central / 1:00 pm Mountain / 12:00 pm Pacific / 11:00 am Alaskan time zone. Line will open 15 minutes
